

SCHNEIDER

**Choose a
company that's
invested in you**

Schneider focuses on your
safety and comfort

Schneider uses industry-leading equipment and technology to create the best possible driver experience. As a Schneider driver, you'll enjoy:

Superior driver safety

We believe your safety should *always* come first. That's why we've invested in essential safety features such as collision mitigation, lane departure warning and electronic stability control systems.

Best-in-class equipment and tech

We add thousands of new tractors and trailers to our fleet every year, meaning you'll spend less time dealing with outdated equipment and more time making money driving in comfort.

A home away from home

At Schneider, those "nice to have" things like memory-foam mattresses, bunk heaters, APUs and built-in fridges are just the norm. Our sleeper trucks average just over two years old, so drivers always have access to dependable equipment with the best comfort features.

Want to learn more? I'll be available to answer your questions at my upcoming hiring event. See you there!
